## EDUCATION

---

**B.Tech in Artificial Intelligence and Machine Learning**  
University College of Engineering Kakinada (UCEK), JNTUK

2024 – present

## TECHNICAL SKILLS

---

|                       |                                                                                           |
|-----------------------|-------------------------------------------------------------------------------------------|
| Programming Languages | :Java, Python, C                                                                          |
| Web Technologies      | :HTML, CSS, JavaScript                                                                    |
| Database              | :DBMS, SQL                                                                                |
| Core Concepts         | :Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving |
| Tools                 | :VS code, GitHub, Firebase, PyCharm, Jupyter Notebook                                     |

## EXPERIENCE

---

**Artificial Intelligence and Machine Learning Intern**

SmartBridge May 2026

- Selected for the APSCHE Short-Term Virtual Internship Program focused on Artificial Intelligence and Machine Learning.
- Participating in structured technical training, live sessions, and hands-on learning activities.
- Gaining practical exposure to AI/ML concepts, Generative AI, and industry-oriented technologies.

## PROJECTS

---

**Wishlist Web Application:** Manages personal wishlist tasks efficiently

[GitHub](#) | [Demo Link](#)

**Tools:** HTML, CSS, JavaScript

- Developed a responsive wishlist application with add, delete, and task completion features.
- Implemented LocalStorage to save user data across browser sessions.
- Used JavaScript for dynamic DOM manipulation and event handling.

**Electricity Bill Management System:** Organizes and manages electricity billing records [GitHub](#)

**Tools:** DBMS, MySQL, SQL

- Designed a relational database to manage customer details, billing, and payment records.
- Implemented SQL queries for bill generation, data retrieval, and payment tracking.
- Applied DBMS concepts and normalization to improve data organization and accuracy.

## CERTIFICATES AND ACHIEVEMENTS

---

- **The Competitiveness Mindset Institute, USA – Finding Leader in You Scholar Program**
- **GeeksforGeeks (GFG):** [Java Programming](#) , [100 Days of Interview Puzzles](#) , [Soft Skills](#) , [AI Tools](#)
- **Infosys:** [Programming using Java](#) , [DBMS](#)
- Won the ISEA Hackathon at JNTUK by developing an innovative solution under time constraints, demonstrating teamwork and problem-solving skills.
- Selected as a scholar under the Foundation for Excellence (FFE) Scholarship Program based on academic merit.
